APPLICANT : RICOH CO LTD;

INVENTOR : OKAZAKI HIROMICHI;

INT.CL. : H04N 1/387 H04N 1/00

TITLE : IMAGE-PROCESSING SYSTEM, POST
CARD PRINT SYSTEM
IMAGE-PROCESSING METHOD, POST
CARD PRINT METHOD, AND
RECORDING MEDIUM READABLE BY
COMPUTER RECORDED WITH
PROGRAM TO ALLOW COMPUTER TO
EXECUTE EACH PROCESS OF EACH
METHOD

ABSTRACT : PROBLEM TO BE SOLVED: To increase the transfer speed of image data between a computer and a copying machine.

SOLUTION: This system has a copying machine 101 that conducts processing of reading image data from an original and print processing of the image data, a computer 100 that edits the image data read by the copying machine 101, and a memory storing the image data, and a memory board 102 to which an image data bus of the copying machine 101 and an internal bus of the computer 100 are respectively connected. The copying machine 101 executes processing of reading the image data from the original and writing the data to the memory, the computer 100 executes processing of reading the image data from the memory, editing the data, and rewriting the edited image data to the memory, the copying machine 101 executes the processing of reading the edited image data from the memory and printing the data, and the memory board 102 controls read/write of the image data by the copying machine 101.
